

CASE STUDY

Rehoboth Christian Ministries – Human Services

MISSION:

Rehoboth Christian Ministries works to serve people with disabilities and allow them to flourish in life. Founded in 1976, they began their mission with a single camp in Central Alberta and now provide support with over 50 group homes across the province.

HOLDING THEM BACK:

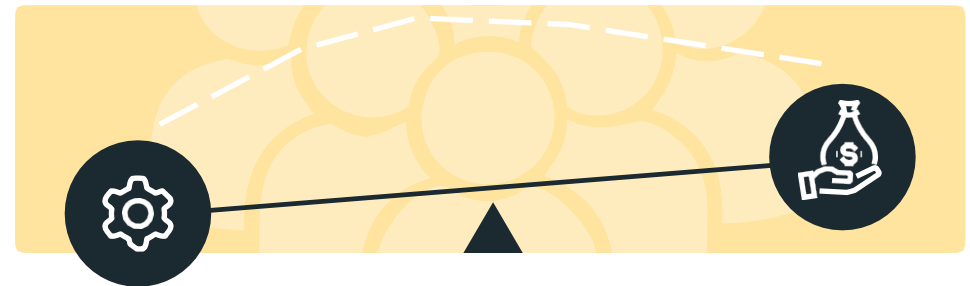

Rehoboth's finance and payroll departments were overwhelmed with manual tasks and disconnected systems. Payroll took 2-3 days to complete due to the use of paper timesheets, no scheduling solution, and the need to constantly import excel spreadsheets into their previous financial system.

HOW WE HELPED:

Sparkrock 365 provided the integration, reporting, and scheduling features RCM needed. Our partnership with Microsoft was a key driver in their decision-making process. It allowed Rehoboth to integrate other Microsoft 365 applications, such as Outlook for email and Microsoft PowerBI, a data visualization platform for advanced reporting.

HOW THEY NOW LEVERAGE TECHNOLOGY TO SERVE MORE PEOPLE:

With Sparkrock 365 and Microsoft Power BI, the system automatically generates quarterly reports and bi-monthly financial statements for Rehoboth's Board of Directors. This makes it easier for Rehoboth to assess what programs are most impactful, where additional resources might be needed, and ultimately provide a higher quality of care to those they serve.

“It's just invaluable for us to validate why we are doing what we are doing, with our money and time. Our reports have become more efficient. We are right down to the dollar with our spending. We are more fiscally responsible than ever before because we can report accurately to the government.”

-Janice Gerbrandt

Director of Corporate Services, Rehoboth Christian Ministries
